i2i Internship to Innovation – Core Ramp Up Program

with **Luo Hao**

1

What attracted you to apply for Xcellink's i2i Internship to Innovation – Core Ramp Up Program?

Luo Hao

It's a great opportunity to learn IT skills especially for people who are seeking for a mid-career switch with basic computing knowledge. As well as to get intensive training and hands on experience in order to be equipped before moving forward to in the industry.

2

What are the 3 important skills/take aways that you have learned in this program?

Luo Hao

- Allocate enough concentration time and eventually the tasks that seem impossible will get done
- Planning in details and sticking to the plan as much as possible.
- Clearing any doubts as early as possible to build solid foundations.

3

What do you think of the program structure; from training to work attachment to post program?

Luo Hao

The structure works fine for me and got me well prepared for the tasks. I can implement what I learned to my assigned tasks and was able to progress nicely.

4

What advice would you give to future trainees that are interested in this program?

Luo Hao

- Have to be proactive in getting the knowledge from learning as much as possible.
- Need to ask and clarify any questions no matter how basic the questions seems, in order to have good understanding since we're learning something new
- Spend time to repeat practices.

5

How do you think the skills you have learned will benefit you in your career path?

Luo Hao

It benefits as it fits the career path I'm looking forward to pursue.

6

What is your feedback about the support from your Mentor and Program Consultant?

Luo Hao

The support is great and indeed helped me in learning the skills. They were resourceful and able to provide precise answers to solve my issues. Their guidance makes every step of the learning process very clear and allowed me to have a great time learning.

7

What improvements
do you want to see
in the future?

Luo Hao

To make it fully physical classes.

8

How relevant is your background prior to this program and how has it helped you in upskilling your skills?

Luo Hao

Previously, not much relevance in computing since I was in the engineering field. The program helps me to gain knowledge in OutSystems effectively and in turn, can be deployed to real life work.
